

INTENSIVE SERVICES NETWORK FOR COURT-INVOLVED, HIGHEST RISK YOUTH

Youth are adjudicated (found to have committed an offense), and are placed under the commitment guidelines of the NC Dept. of Juvenile Justice to a Youth Development Center --- but remain in the community so that rehabilitation, education and treatment services are more appropriately available and accessible to families. Serious infractions or violations result in immediate removal to the institution.

The goal of the Intensive Services Network is to have court-involved youth demonstrate social, academic, emotional and personal life management skills while maintaining community safety and holding them accountable for their delinquent behavior. Ultimately we will reduce our reliance on, or use of, institutional care and the placement of youth by providing flexible, community-based and wrap-around programming in partnership with other human services providers and natural supports
